

APPENDIX B

DOCUMENTS IN THE PROJECT ARCHIVE

Approximately nine linear feet of documentation about the Market Street Chinatown and the ARS excavations on Block 1 are housed in the Project Archive. During the document cataloging process, 285 document numbers were assigned in seven different categories. Below is an inventory of the documents that comprise the Project Archive.

It should be noted that blanks in the bibliographic information for a document indicate that that information is not available for the given document. Given the fragmented nature of the Project Archive, there are many gaps in our knowledge of the documents, and rather than guess about bibliographic information, these fields were left blank in the database.
